REPORT NARRATIVE (REFERENCE STIPULATIONS BY NUMBER OR TITLE)

I inspected this notice on July 11, 1996, and came to the conclusion that no activity had taken place since Northern Stone had acquired these claims from Steven Hodges in September, 1994.

This inspection came up with the same findings, there has been no further work completed on this notice since its acceptance in September of 1994. A letter we received from Northern in September, 1994, after they got the acceptance stated they wouldn't be changing their operations for several years, which consisted of removal of material with track-hoe type equipment, and hand held drilling equipment. The site is clean, free of debris, and poses no hazards to public and livestock.
